

Eternum Test Security Audit Log

This document serves as a time-stamped security and activity log generated during the execution of a Real-time Security Audit.

The purpose of this log is to transparently demonstrate the security-conscious and resilient development environment.

Protocols Engaged:

- Ghostwire Watchdog Protocol activated
- Whisper log created with timestamped audit entries
- Full runtime tracked passively and manually patched
- Audit log terminated manually and cleanly

Timeline:

- Start: 2025-04-03 10:00:00
- End: 2025-04-03 11:15:00

Log Summary:

All log entries were captured in real time and written to:

~/whisper-logs/test_watchdog_20250403_104552.log

Final line:

[2025-04-03 11:15:00] :: Final test review complete. System logs sealed. Eternum audit concluded.

Purpose:

To demonstrate:

- System-level audit awareness
- Reaction to runtime conditions and conflicts
- Test performed without elevated permissions
- Transparent timestamped logging of the full coding window

Next Steps:

This PDF and the associated .log file may be submitted with your test project to showcase proof of process
